

User Manual Desktop Buddy

Dear user welcome to the Computer Assistant Desktop Buddy, made by Kamil Szynalski

This is a user manual to help you install Desktop Buddy

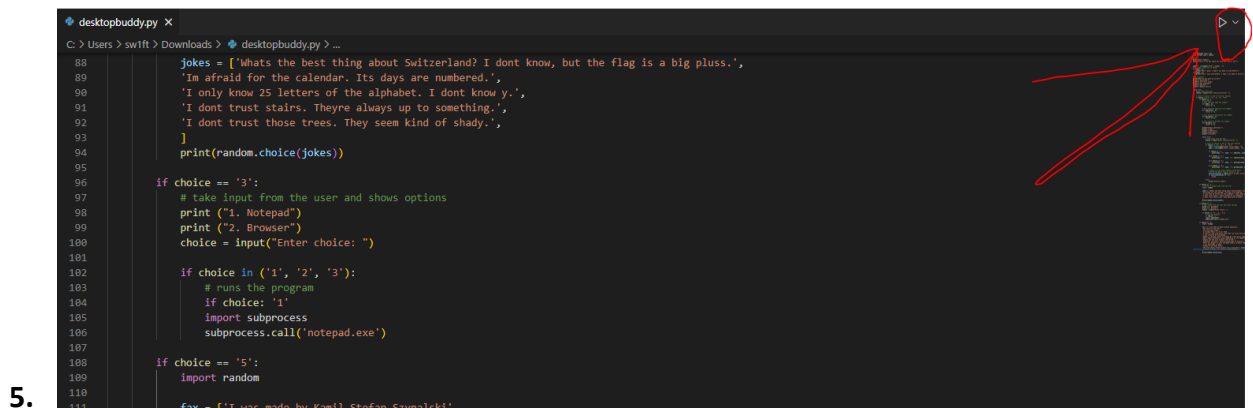

If you are running the Alpha version, you will only get the python file to run in the console

If you are running the Beta version, you will get the app but unfinished

I

Alpha Version

- 1. Click the download button**
- 2. Download any type of Code software or just download Python**
- 3. Open desktopbuddy.py in the software to make it easy just press ctrl + O**
- 4. Now that you installed it you need to run it by clicking the run button marked red**

6. After running the code, the program should come up with a few options, and from here you are free to do whatever you might desire. If you need a deeper explanation of

Desktop Buddy I suggest you look at the User Manual
